wireless peace of mind

JamBOSS™
AUTO-LOCKING TECHNOLOGY

JUNE 2026

PATENTED TECHNOLOGY

ENDORSEMENTS AND ACCREDITATIONS

HaltLock™, an innovative anti-theft device installed in vehicles with an impressive 100% success rate, has endorsements from **Discovery Insure**, **Strategic Insurance Systems** and **King Price**. This recognition from three prominent organizations in the insurance industry not only highlights the credibility and effectiveness of HaltLock's technology but also emphasise the confidence these companies have in HaltLock's ability to stop vehicle theft.

*Discovery clients need both the HaltLock and the Discovery Crowdsearch device installed for full protection.

NO trackers required LOWER insurance premiums

*Terms and Conditions apply

HaltLock™ is ISO 9001 certified, demonstrating our commitment to consistent quality, reliable performance, and continual improvement in vehicle security solutions.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

HALTLOCK™

HaltLock™ is the **ONLY** anti-theft device that **WORKS WHEN IT MATTERS MOST.**

Installed directly onto the side of the gearbox, HaltLock™ physically locks the transmission. When engaged, either automatically via Auto Lock or manually through the app, it completely prevents the vehicle from being shifted out of Park.

Even if criminals gain access to your vehicle and start the engine, they won't be able to drive away. Since the wheels cannot turn, the vehicle is completely immobilized. Attempts to forcefully break the gear lever or cables will be futile, the vehicle will remain locked in place.

IF THE WHEELS CAN'T TURN, YOUR VEHICLE ISN'T GOING ANYWHERE!

AUTO LOCK: AUTOMATIC PROTECTION WHEN YOU PARK

Auto Lock automatically activates HaltLock™ when your vehicle is parked and switched off, securing your vehicle without any action from you. Auto Lock can be enabled or disabled via the HaltLock™ app.

HALTLOCK™ GEN 4 WITH JAMBOSS™ TECHNOLOGY

JamBOSS™ is an intelligent technology integrated into the HaltLock™ ecosystem. When active, it detects the presence of signal-jamming devices and automatically takes action to protect your vehicle.

JamBOSS™ does not interfere with signals, it detects jamming attempts and responds instantly through HaltLock™.

Physical anti-theft protection, enhanced with intelligent awareness. Delivering unmatched peace of mind.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

JamBOSS™

PROTECTION WHEN YOUR VEHICLE IS PARKED

When JamBOSS™ is active and your vehicle is parked and switched off, it monitors for signal-jamming activity.

If a jamming device is detected nearby, JamBOSS™ automatically activates HaltLock™, physically locking the transmission. Even if Auto Lock is disabled or the vehicle was accidentally left unlocked.

An instant alert is sent to your app, warning you that jamming activity has been detected nearby. Alerts can also be forwarded to our control room for added monitoring and peace of mind.

Your vehicle is secured immediately, before criminals have a chance to act.

PROTECTION WHILE YOU'RE DRIVING

When JamBOSS™ is active while the vehicle is in use, it continues to monitor for signal-jamming activity.

If jamming is detected, the driver is alerted through clear audible warnings, providing immediate awareness of potential interference. If the jamming continues, the system responds in a controlled and progressive manner, designed to prioritise driver safety and comply fully with all legal and safety requirements.

Where continued jamming activity is detected, HaltLock™ ultimately immobilises the vehicle to prevent theft.

When JamBOSS™ is active, and a jamming device is detected, the JamBOSS™ technology within the HaltLock™ unit responds immediately. Once the jamming stops and normal signal communication is restored, the system regains full control, allowing you or the control room to securely lock the vehicle.

User Notice

Auto Lock can be enabled or disabled via the HaltLock™ app. For full protection, Auto Lock should remain active. If Auto Lock is disabled, HaltLock™ will not automatically activate.

Alerting, monitoring, and response functions may vary depending on user settings, vehicle status, and connectivity.

JamBOSS™ responses are designed to prioritise occupant safety and comply fully with all applicable legal and safety requirements.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

VEHICLE COMPATIBILITY

(excl. VAT)

*Final pricing may vary depending on the fitment centre. Terms and conditions apply.

FINANCING YOUR HALTLOCK™ DEVICE

Protecting your vehicle shouldn't be complicated or out of reach. That's why financing options are available for HaltLock™ devices on qualifying vehicles.

HALTLOCK™ DEVICE FINANCING ON VEHICLE PURCHASES

The HaltLock™ device can be financed as an additional item when purchasing a new or second-hand vehicle on supported models we install on. Financing for the HaltLock™ unit is arranged through your vehicle purchase, with installation completed at an approved HaltLock™ installation centre. Designed to integrate seamlessly into your vehicle from day one, this allows you to add industry-leading vehicle security without an upfront, once-off payment for the device.

*Financing is subject to approval, vehicle eligibility, and finance provider terms and conditions. Installation must be completed at an approved HaltLock™ installation centre.

WHERE AND WHEN CAN I HAVE MY HALT UNIT INSTALLED?

To have your own HaltLock™ installed, visit our website or call us to book your appointment.

HOW LONG DOES INSTALLATION TAKE?

Professional installation takes approximately 45 minutes to 1.5 hours, depending on the vehicle model, at authorised fitment centres or partner dealerships.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

HALTLOCK™ MOBILE APP

The HaltLock™ app puts powerful vehicle protection in the palm of your hand. Monitor your device's battery status and health, remotely lock or unlock your HaltLock system, and receive instant alerts if suspicious activity, tampering, or signal interference is detected.

JamBOSS™ technology provides intelligent signal-jamming detection, while live vehicle tracking, emergency assistance, and a digital logbook ensure you remain informed and connected wherever you go.

Because true protection doesn't stop when you walk away from your vehicle.

Upon installation, you will receive a HaltLock™ Installation Certificate that can be submitted to your insurer as proof of additional vehicle protection.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

INTRODUCING GUARDIAN CIRCLE

Guardian Circle is built around people who refuse to accept vehicle theft as normal. A growing community driven by prevention, awareness, and people protecting each other.

WHY GUARDIAN CIRCLE EXIST

Vehicle theft has become something people are told to live with. We don't accept that. Guardian Circle was created for people who believe prevention should come first, communities should stand together, and protection should go beyond products.

The strongest part of HaltLock was never just the technology. It was the people sharing experiences, warning others, helping friends protect their vehicles, and standing together against theft. Guardian Circle gives that community a place to belong. A place where awareness grows, trusted experiences are shared, and people help protect one another before theft ever happens. Because real security starts with people who look out for each other.

WHAT YOU GET AS A GUARDIAN CIRCLE MEMBER

Guardian Circle is a free and optional community for HaltLock clients with an active device status. Members become part of a growing movement focused on prevention, awareness, and people helping people protect what matters most.

By sharing HaltLock with friends and family, members can earn a referral reward equal to 5% of the retail device price for every successful and verified installation. Once referred clients become active HaltLock members, they can also join Guardian Circle and share the same opportunity with others.

To remain eligible for membership and rewards, your linked HaltLock device must remain active and subscription payments must be up to date. Referral rewards are processed monthly, and membership may be cancelled at any time.
