Discovery

HaltLock™ is ISO 9001 certified, demonstrating our commitment to consistent quality, reliable performance, and continual improvement in vehicle security solutions.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

HALTLOCK™

HaltLock™ is the ONLY anti-theft device that WORKS WHEN IT MATTERS MOST.

100% Theft Prevention 100% Peace of Mind

Installed directly onto the side of the gearbox, HaltLock™ physically locks the transmission. When engaged, either automatically via Auto Lock or manually through the app, it completely prevents the vehicle from being shifted out of Park.

Even if criminals gain access to your vehicle and start the engine, they won't be able to drive away. Since the wheels cannot turn, the vehicle is completely immobilized. Attempts to forcefully break the gear lever or cables will be futile, the vehicle will remain locked in place.

IF THE WHEELS CAN'T TURN, YOUR VEHICLE ISN'T GOING ANYWHERE.

AUTO LOCK - AUTOMATIC PROTECTION WHEN YOU PARK

Auto Lock automatically activates HaltLock™ when your vehicle is parked and switched off, securing it without you needing to do anything, even if it's accidentally left unlocked. Auto Lock can be enabled or disabled via the HaltLock™ app.

HALTLOCK™ GEN 4 WITH JAMBOSS™ TECHNOLOGY

JamBOSS™ is an intelligent technology integrated into the HaltLock™ ecosystem. When active, it detects the presence of signal-jamming devices and automatically takes action to protect your vehicle.

JamBOSS™ does not interfere with signals, it detects jamming attempts and responds instantly through HaltLock™.

Physical anti-theft protection, enhanced with intelligent awareness.
Delivering unmatched peace of mind.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

PROTECTION WHEN YOUR VEHICLE IS PARKED

When JamBOSS™ is active and your vehicle is parked and switched off, it monitors for signal-jamming activity.

If a jamming device is detected nearby, JamBOSS™ automatically activates HaltLock™, physically locking the transmission.

Even if Auto Lock is disabled or the vehicle was accidentally left unlocked.

An instant alert is sent to your app, warning you that jamming activity has been detected nearby. Alerts can also be forwarded to our control room for added monitoring and peace of mind.

Your vehicle is secured immediately, before criminals have a chance to act.

PROTECTION WHILE YOU'RE DRIVING

When JamBOSS™ is active while the vehicle is in use, it continues to monitor for signal-jamming activity.

If jamming is detected, the driver is alerted through clear audible warnings, providing immediate awareness of potential interference. If the jamming continues, the system responds in a controlled and progressive manner, designed to prioritise driver safety and comply fully with all legal and safety requirements.

Where continued jamming activity is detected, HaltLock™ ultimately immobilises the vehicle to prevent theft.

When JamBOSS™ is active, and a jamming device is detected, the JamBOSS™ technology within the HaltLock™ unit responds immediately. Once the jamming stops and normal signal communication is restored, the system regains full control, allowing you or the control room to securely lock the vehicle.

User Notice

Auto Lock and JamBOSS™ features can be enabled or disabled via the HaltLock™ app. For full protection, these features must be active. If Auto Lock and JamBOSS™ are disabled, HaltLock™ will not automatically activate.

Alerting, monitoring, and response functions may vary depending on user settings, vehicle status, and connectivity.

JamBOSS™ responses are designed to prioritise occupant safety and comply fully with all applicable legal and safety requirements.

KEEPING IT STATIONARY IS THE KEY FUNCTION!

HALTLOCK™ NOW AVAILABLE FOR THESE VEHICLES

KEEPING IT STATIONARY IS THE KEY FUNCTION!

FINANCING YOUR HALTLOCK™ DEVICE

Protecting your vehicle shouldn't be complicated or out of reach. That's why financing options are available for HaltLock™ devices on qualifying vehicles.

HALTLOCK™ DEVICE FINANCING ON VEHICLE PURCHASES

The HaltLock™ device can be financed as an additional item when purchasing a new or second-hand vehicle on supported models we install on. Financing for the HaltLock™ unit is arranged through your vehicle purchase, with installation completed at an approved HaltLock™ installation centre. Designed to integrate seamlessly into your vehicle from day one, this allows you to add industry-leading vehicle security without an upfront, once-off payment for the device.

HALTLOCK™ DEVICE FINANCING AS AN ADD-ON FOR YOUR CURRENT VEHICLE

We're expanding HaltLock™ financing options to make premium vehicle protection accessible for your current vehicle. Vehicle owners can apply to finance a HaltLock™ device independently of a vehicle purchase, making it easy to upgrade your vehicle's security without an upfront, once-off payment.

DETAILS WILL BE ANNOUNCED SOON.

**COMING
SOON**

*Financing is subject to approval, vehicle eligibility, and finance provider terms and conditions. Installation must be completed at an approved HaltLock™ installation centre.

WHERE AND WHEN CAN I HAVE MY HALT UNIT INSTALLED?

To have your own HaltLock™ installed, visit our website or call us to book your appointment.

HOW LONG DOES INSTALLATION TAKE?

Professional installation takes approximately 45 minutes at authorised fitment centres or partner dealerships.
